

Burndown Chart

Date - June 26th, 2023 - July 7th, 2023

- We were unable to assign user story points before the sprint 2 start date because of scheduling conflicts. The planning meeting was conducted on June 29 instead of June 27. As a result, the orange line is at 0 until June 29.
- The review meeting was conducted on July 6 and this is when we decided which stories were completed. As a result, the orange line is unaffected until July 7.
- There were multiple stories that depended on each other thus, CGP-25 couldn't be completed.

Velocity

Sprint 1 velocity = 20 story points (6/6 user stories)

Planned velocity for sprint 2 = 21 story points

Completed velocity for sprint 2 = 19 story points (5/6 user stories)

We planned to complete 21 story points for sprint 2 because it was very close to what we accomplished in sprint 1. However, we were unable to complete 1 user story for sprint 2 due to dependency issues.
